

Basic Concepts of Cell Biology, Sem-II, UPC 2492011203

Department of Biochemistry, Shivaji College, University of Delhi, University of Delhi

1. Give the location of the following: (2)
 - i. Succinate dehydrogenase
 - ii. Acid phosphatase
2. What property of Glycosaminoglycans allows them to form hydrated gel? (2)
3. The Chloroplast is a semi-autonomous organelle that has a prokaryotic origin. Explain. (2)
4. Write a short note on Gaucher's disease. (2)
5. Why is the Golgi apparatus called the post office of the cell? (2)
