Learning outcomes:

For team members

The student members learnt how to prepare a questionnaire and how to carry out a questionnaire-based field survey.

They learnt how data can be summarised, analysed and interpreted.

They learnt how to present the findings in a report.

For the community

The assessment of the implementation of Swachh Bharat Mission in Raghubir Nagar showed that its impact was limited. It had reduced open defecation but overall, solid waste management continues to be a major problem in the area. A majority of those interviewed did not segregate waste in their homes and irregular waste collection, open dumping and insufficient public sanitation facilities continue to plague the area.
