**Dear Colleagues,**

As part of our ongoing campaign and pursuit of green practices in the effect, I request all teaching and non-teaching staff to adopt the following measures. Volunteers should also ensure that following measures are strictly implemented:

1. Fans and lights are to be switched off whenever not in use.
2. Recycling and re-use of wastewater should be maximized.
3. Re-inforce the use of one-side printed-paper.
4. Ban on use of paper/plastic for decorating the campus.
5. Minimise the use of paper.
6. Recycle waste paper.
7. Recycle e-Waste material.

Best practices in science labs can be adopted with the following measures:

1. Toxic waste are to be safely disposed of.
2. Gas burners are to be turned off while not in use.
3. Lights of microscopes are to be turned off when fully charged.
4. Smaller burettes and pipettes should be used to save chemicals.
5. Promote the use of auto-pipettes.

I am of the conviction that all these small but significant measures will help in saving energy. I solicit your support in this campaign.

**Principal**

- Landscaping with Trees and plants
