

ABOUT THE WORKSHOP

OPEN DATA : WORLD BANK DATABASE

Data analysis plays a key role in formation of new policies and programmes. Open Data is very crucial component of research in today's world and widens the scope of research to higher levels.

Open data development and knowledge sharing are all at the forefront of the World Bank. Open data facilitates for improved transparency, reliability and accountability. World Bank provides its members with easy-to-use data and documents freely.

This workshop aims at providing with hands-on training on Open Data usage. The workshop will train you to extract, use and analyze the vast data available online on several indicators. This data analysis can be helpful across many disciplines to not only better understand existing theories but also to guide future research work.

SPEAKER

MS. SUNITA MALHOTRA

Ms. Malhotra is presently working as Communications Associate at the World Bank, New Delhi and has spent more than two decades with this organisation. She believes in the power of knowledge and tries to empower youth by conducting knowledge sessions at various youth events and arranging competitions, talks and training sessions.

She facilitates "Open Data and Open Development" trainings for academics, researchers, policymakers, think tanks, civil society organizations, students, bureaucrats and journalists interested in learning more about the World Bank's data and knowledge offerings.

She has also worked in the American Center, in the commercial sector, for an NGO and for a library-management software company called LIBSYS.
