

Notice Regarding Solar Lamp

India is endowed with huge solar energy potential. Solar energy is inexhaustible, non-polluting and it requires very less infrastructure. It has the ability to satisfy our energy needs, and can reach even to the remotest areas, if harnessed properly. National Service Scheme, Shivaji College cordially invites you all to a workshop being conducted by Indian Institute of Technology, Bombay on Solar Energy. The workshop is being conducted as a part of the SOULS (Solar Urja through Localization for Sustainability) which is a step in bringing solar energy to every household.

IIT Bombay entered Guinness World Record in 2018 for "Most LED lights lit simultaneously", when over 1.25 lakh students trained to assemble their own solar lamp on 2nd October, 2018.

This year Shivaji College is participating in the project, in which 100 other nations are also participating. The workshop will be organized in Shivaji College on 2nd October, 2019.

The workshop provides an excellent opportunity to the students to learn making solar lamps with the help of solar kits which are being provided by IIT at a cost of Rs 520.

The students volunteering for the event will also be awarded with a certificate of participation.

The interested students can register by paying the required fees.

To pay fees:

- 1. Collect slip for fees payment from Mr. Virender of Diary Section, of Shivaji College office on Thursday and Friday from 10 am to 1pm
All details have been filled in the slip. The applicant needs to fill his/her personal details in the slip.*
- 2. Make payment in Central Bank of India latest by Saturday.*
