

Workshop as a part of Project SOULS (Solar Urja through Localization for Sustainability) by IIT Bombay on Solar Energy.

India is endowed with huge solar energy potential. Solar energy is inexhaustible, non-polluting and it requires very less infrastructure. It has the ability to satisfy our energy needs, and can reach even to the remotest areas, if harnessed properly. **National Service Scheme, Shivaji college** cordially invites you all to a workshop being conducted by **Indian Institute of Technology, Bombay on Solar Energy**.

The workshop is being conducted as a part of the **SOULS (Solar Urja through Localization for Sustainability)** which is a step in bringing solar energy to every household. It provides an excellent opportunity to the students to learn making solar lamps with the help of solar kits which are being provided by IIT at a cost of Rs 520. The students volunteering for the event will also be awarded with a certificate of participation

The interested students can register themselves through the link provided below.

Date - 2nd October (Gandhi Jayanti) 2019

Venue - Auditorium, Shivaji College
